Roundtable Team
Version Control

Roundtable® Team — competitively priced, commercially supported, and powered by Progress OpenEdge technology to capitalize on the Eclipse platform — offers the power and simplicity of version control in a distributed development environment. With Team, you can track and manage changes to development projects, application source code, and related files within an *unified* development platform.

Benefits

- Designed for Eclipse
- Simplifies team collaboration
- Increases change history visibility
- Facilitates change rollback

Designed for Eclipse

The Roundtable Team client, designed specifically for the Eclipse platform — an open source community focused on building an open development platform of extensible frameworks, tools and runtimes for building, deploying and managing software across the lifecycle — installs easily and operates in a consolidated development environment with a familiar interface for all users.

Simplifies team collaboration

With the ability to manage unlimited software development projects and all project resources in a single repository, Roundtable Team provides easy and effective management of the software development process and serves as a vital resource for team collaboration and parallel development.

Features

Atomic Commits —Ensure that all related modifications are committed as part of a single change set.

Change History —Allows you to explore the repository at any change level.

Comparison Tools—Allow you to view the differences between individual files, Tags, or Branches.

File Revision and Lineage Tracking — Identifies file versions that share a common parent.

Named Branching — Enables users to isolate separate development streams.

Optimized Merging — Utilizes file lineage to streamline synchronization between development streams.

Parallel Development — Enables developers to work locally and synchronize with the repository at any time.

Tags — Allow you to create labels that easily identify and navigate significant points in

---

System Requirements

The Roundtable Team server is supported on OpenEdge release 10.2A and later platforms. The Roundtable Team plug-in requires OpenEdge Architect 10.2A or later or Eclipse 3.4 or later platforms. The Roundtable Team repository requires both OpenEdge database and OpenEdge AppServer licenses.

REPUTATION

For more than a decade, Roundtable software has played a critical role in providing change management solutions to development teams worldwide.

THE EDGE

The Roundtable Team server is built on technology you trust — Progress® OpenEdge® — delivering proven performance, security, and scalability for your valued software applications.
